CAREER OBJECTIVE

Aspiring Cloud and DevOps Engineer passionate about designing scalable cloud, web, and AI-powered solutions. Driven to build impactful real-world projects while continuously learning and embracing modern technologies.

EDUCATIONAL QUALIFICATIONS

- **B.Tech – Computer Science and Business Systems**
K. S. Rangasamy College of Technology, Tiruchengode (2023 – 2027)
CGPA: 7.92 (up to 5th Semester)
- **HSC (II-Group)**
Sri Vidya Mandir MHSS, Salem Steel Plant (2023)
Percentage: 86.7% — Cutoff: 180.5

TECHNICAL SKILLS

- **Programming:** Java, Python, C
- **Web Development:** MERN Stack, Python Flask, Bootstrap 5, MySQL
- **Cloud & DevOps:** AWS, Terraform, Docker, Github Actions
- **Tools:** Git, GitHub, VS Code, Cursor IDE, Antigravity
- **Data:** Excel, Power BI

INTERNSHIP EXPERIENCE

- **Shadowfox – Web Development Virtual Internship** Jan 2026
Worked as a Web Development Intern developing responsive web applications aligned with client requirements. Implemented structured front-end architecture with clean and maintainable code and contributed to deployment readiness.
- **Eduskills – Google AI/ML Virtual Internship** Oct 2024 – Dec 2024
Completed hands-on training in supervised and unsupervised machine learning techniques. Applied preprocessing, feature engineering, neural networks, and Responsible AI principles to build structured ML workflows.
- **Tech Nuke IT Solutions, Thirupattur** Jul 2024 – Aug 2024
Worked as a Web Developer Intern designing responsive web components using HTML, CSS, and JavaScript. Integrated REST APIs and collaborated with the development team for deployment and client delivery.

CERTIFICATIONS

- GitHub Foundation (GHF:900) – June 2026
- MongoDB Certified Associate Developer - Apr - 2026
- Fundamentals of Prompt Engineering (AWS Training and certificates) – Jan 2026
- Salesforce Certified Agentforce Specialist – Aug 2025
- AWS Cloud Practitioner Essentials (AWS Training and certificates) – June 2025
- NPTEL: Joy of Computing using Python (Elite) – Nov 2024

LEADERSHIP & ACTIVITIES

Student Innovation Ambassador — DSA & Development Club — Readers Club Member

PROJECTS

- **Startup AI – Visual Co-Founder Platform**

Built a full-stack AI platform using Python Flask, MongoDB, and Google Gemini API to validate startup ideas through ML-powered scoring. Implemented JWT authentication, role-based access, team management, government scheme discovery, a Wikipedia research agent, and an AI chatbot for intelligent guidance.

- **Quiz Application on Cloud**

Developed and deployed a cloud-based quiz application using AWS and Terraform. Hosted on Amazon EC2 with secure configuration, scalable architecture, DynamoDB integration, and real-time quiz response handling.

- **Skill2Hire – AI Placement Prediction (AIDLC)**

Developed an AI-powered placement prediction web application using a Voting Classifier ensemble (Random Forest, Gradient Boosting, Logistic Regression). Built with Flask REST API, Supabase PostgreSQL, Docker, GitHub Actions CI/CD, automated retraining and testing, and deployed on Render.

- **Student Academic Prediction – Ensemble Learning (MLOps)**

Built a full-stack web application that predicts Pass/Fail outcomes using five ensemble ML models. Integrated explainable AI visualizations, a rule-based academic advisor, prediction history logging with Supabase PostgreSQL, and interactive dashboards using Chart.js.

- **GreenGlow Cosmetics – MERN E-Commerce Platform**

Developed a full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js. Implemented JWT authentication, role-based access control, product CRUD operations, and an admin dashboard.

- **Weather App**

Developed a responsive weather application using React.js that fetches real-time weather data through an external API. Built with reusable components, React Hooks, custom CSS, and deployed following modern frontend workflows.

- **ASTRA AI Chatbot**

Built a real-time AI chatbot using Python Flask and the Gemini API. Applied prompt engineering techniques and developed a scalable backend for continuous conversational AI interactions.

CODING PROFILES & OPEN SOURCE

- **GitHub** – Achieved **750+** contributions through open-source projects, personal repositories, and collaborative development.
- **LeetCode** – Solved **140+** coding problems across Data Structures, Algorithms, and problem-solving challenges.
- **Docker Hub** – Published and maintained Docker images with over **3,250+ pulls**, demonstrating containerization and DevOps deployment expertise.
